

STAT 485/685 Lecture 23 Fall 2017
4 December 2017

- I talked about the final.
- It covers Chapters 1 through 9.
- Some more technical bits of those chapters which I did not cover in class will not be covered.
- You can bring in 6 sheets of paper (12 sides) with notes written or printed on both sides.
- I intend it to be a 3 hour or less exam.
- It is more focused on material after the midterm.
- It has a lot in common with the midterm in style but there is a bit less writing, I think.
- There will be theoretical calculations involving means, variances, covariances, correlations, standard deviations, forecasts, forecast errors, and forecast standard errors.
- I will not ask you to write R code.
- I will be available Tuesday morning from about 11 to noon.
- I will be available Wednesday after about 11 but you may have to find me around the department and I will be having lunch 12:30 to 1:30 and maybe coffee at random other times.
- Similarly I will be available on Thursday after lunch.
- Handwritten slides.
